SUMMARY

Accomplished Senior Software Engineer confident in design, development, and team leadership. Consistent in accomplishing project goals and satisfying customers with exceptional software solutions. Well-versed in current technologies, trends, and programming languages. Expert in React, NextJs, React Native, NodeJS, ExpressJS, MySQL and Typescript. Experienced in collaborating with cross-functional teams and leading projects to successful completion. Passionate about problem-solving and delivering innovative and high-quality software solutions that drive business success.

Currently seeking a challenging role to leverage technical skills, leadership ability, and a commitment to achieving corporate objectives.

TOOLS

- React
- React Native
- Nodejs
- Expressjs
- Google Cloud
- Typescript
- ThreeJS
- MySQL
- Database Design
- Git
- Opensource Technologies
- Mapbox
- Project leadership

STRENGTHS

- System Architecture Design and Development
- Software Development
- Project leadership and management
- Opensource Technologies
- Training and Mentorship
- Stakeholder & Partnership Management

EXPERIENCE

BITCOOPS

CHIEF TECHNICAL OFFICER (CTO/CEO)

2023-Present

- Developed a system to monitor and manage the financial activities of cooperative members, ensuring accurate record-keeping and transparency.
- Designed and integrated an inventory management feature, allowing efficient tracking of cooperative assets and resources.
- Implemented a secure voting mechanism within the app, enabling members to participate in important decisions and discussions.
- Created a module to facilitate loan application, approval, and repayment processes, enhancing member access to financial support.

MYLIKITA HEALTH SOLUTIONS LIMITED

CHIEF TECHNICAL OFFICER (CTO)

2022-2023

- Developed platform for managing credit customer management, order request, and fulfilment using React and Node.js.
- Implemented features to provide insights into customer credit limits.
- Collaborated with various cross-functional teams, including product management and data analytics, was pivotal in aligning software deliverables with business objectives.
- Consistently took the lead in architectural decisions and strategy discussions, steering the development of scalable and efficient systems that met both immediate requirements and future expansion plans.
- Developed and integrated an Insurance Agency Management Solution

BRAINSTORM IT SOLUTIONS

SENIOR SOFTWARE ENGINEER

2021 - 2022

- Oversaw complete software development lifecycle for an Electronic Medical Records application.
- Coordinated team members to ensure smooth collaboration and efficient workflow
- Maintained the project's open-source codebase by reviewing and merging contributions from the community
- Set up the necessary infrastructure for the project, including version control, issue tracking, and continuous integration systems
- Mentored junior team members, making architectural decisions, and collaborating closely with other stakeholders such as product managers and UX/UI designers.

SOFTWARE ENGINEER

2020-2021

- Implement backend service for an emergency management platform using Node.js and MySQL
- Wrote automated tests from React web components using TDD framework such as Jest.
- Designed and implemented backend services for a cooperative management platform using Node.js, express.js, Sequelize, MySQL, nodemailer, passport and other Node.js libraries.
- Collaborated with various cross-functional teams, to develop interfaces for a ride-hailing platform using React Native and react-native-maps
- Integrated mobile apps with backend API services.
- Designed documentations for APIs using Swagger and SwaggerHub.

EDUCATION

- **University of People**
Computer Science
2021-2024
- **Diploma In Frontend Engineer**
Openclassroom
2020-2021
- **UI/UX Design**
Udemy
2020
- **Osun College of Education**
Accounting Education
2012 - 2015

INTERESTS

- Traveling
- Research
- AI
- Blockchain

OPERATION SYSTEM

- Mac
- Window
- Linux

DICEBOX INNOVATION HUB

JUNIOR SOFTWARE ENGINEER

2018-2020

- Managed and supported a health information management solution.
- Conducted training sessions for basics of website development using HTML, CSS and vanilla JavaScript
- Effectively collaborated with various cross-functional teams, ensuring seamless coordination and implementation of project requirements
- Participated in data gathering for software development projects

MR BEE PHOTOGRAPHY

PHOTOGRAPHY / GRAPHIC DESIGNER

2012-2017

- Proficient in Adobe Photoshop for design work
- Skilled in photography, capable of operating a camera effectively
- Experienced in designing photobooks for various projects
- Proficient in managing and utilizing Photoshop plugins, including installation and removal.

FREELANCE PROJECTS

MEDPING

REACT NATIVE DEVELOPER

SKILLS: React Native, react-native-video, API Integration

- Designed and implemented interface for social platform for medical professionals.
- Implemented in-app chat features where users can create group or send a direct message to other users.
- Integrated an optimized video feeds module with infinite scrolling capabilities.
- Implemented video cutting feature when users are uploading videos to the platform.

SANDA-TIREDA

FULLSTACK WEB/MOBILE DEVELOPER

SKILLS: CSS, React, Redux, React Native, Node.js, MySQL

- Designed a user-friendly platform for both web and mobile devices, enabling customers to easily place orders from the convenience of their choice.
- Developed a specialized feature catering to small show owners, facilitating seamless ordering of items based on their specific needs.
- Integrated a credit limit system, granting eligible customers the flexibility to order items within a predefined credit boundary.

NEMA

FULLSTACK WEB DEVELOPER

SKILLS: HTML, CSS, JavaScript, React, Node.js, MySQL, Mapbox

- Implemented a map-based interface using Mapbox technology, displaying real-time disaster information for enhanced visualization.
- Created a dynamic system that captures and displays up-to-date disaster occurrences, aiding in immediate response and resource allocation.
- Developed a user-friendly reporting mechanism, enabling users to quickly submit information about ongoing disasters, assisting emergency response teams in timely intervention.
